## New Stand-Up Tip Cap For Syringe Barrel

Product Update

OK International is pleased to introduce the new Stand-Up tip cap for use with luer lock syringe barrels. Designed to seal syringe barrel tip during storage and shipment, the new tip cap has a large flat bottom surface that enables the syringe barrel to stand upright. This feature allows any existing entrapped air to migrate up to the piston where it can be easily removed.

Molded from Polypropylene resin, the blue Stand-Up tip cap is compatible with a wide range of dispensing fluids. The new tip cap features a large knurled gripping surface to allow for easy installation and removal.

Stand-up tip caps are sold in packs of 50

### Features:

- Large flat bottom surface allows for syringe barrel to stand upright
- Compatible with all luer lock syringe barrels
- Large Knurled gripping surface for easy installation and removal

Part Number	Description
900-STC	Stand-up Tip Cap, Blue

The new Stand-Up tip cap will be available from July 2011.
